Andrei Stepin

Senior Product Designer

Bishkek, Kyrgyzstan | UTC+6 | Portfolio | LinkedIn
stepinandre@gmail.com | @andreigarm

Profile

Designer with 11+ years of experience spanning game interfaces, web and mobile products, specializing in fintech, banking CRM systems, and complex operational workflows. I translate business requirements and technical constraints into clear user flows, prototypes, and detailed interfaces. My work includes data tables, dashboards, configurable widgets, and component libraries. I support projects from requirements analysis through implementation review with product and engineering teams. Experienced in distributed teams working with clients in the US and Europe.

Core expertise

Complex web applications and mobile banking • User flows and information architecture • Data tables, dashboards, and forms • Role-based interfaces • Interaction design and prototyping • Design systems, components, tokens, and guidelines • UX research and usability testing • Developer handoff and design review

Tools: Figma, Adobe Illustrator, Photoshop, After Effects, Unity (level prototyping)

Professional experience

Devolution

Senior Product Designer | *Mar 2025 – Present*

- Design mobile banking and CRM interfaces for partner managers, verification specialists, administrators, and accountants.
- Develop flows for authentication, customer management, applications, cards, accounts, deposits, loans, and payment services.
- Design data tables, filters, detail views, complex forms, and status transitions, accounting for access permissions, localization, core banking requirements, and audit trails.
- Evolve the component library and product visual language. Collaborate with analysts and developers and review implementation quality.

BAKAI Bank · Concurrent role

Senior Product Designer | *Apr 2025 – Sep 2025*

- Designed Bakai24 mobile banking journeys, including registration, authentication, the home screen, transfers, cards, accounts, and financial products.
- Designed an online loan application flow covering consent, forms, document upload, selfie verification, OTP, and submission.
- Created banking CRM interfaces for customer verification and application processing, including staff roles, customer profiles, account restrictions, and audit trails.
- Prepared user flows, interactive prototypes, UI designs, and error states. Supported developer handoff and conducted design reviews.

Eltech (formerly RSK Tech) · Eldik Bank

Product Designer | *Apr 2024 – Mar 2025*

- Designed banking CRM and mobile services, translating business requirements and API models into clear user journeys.
- Created prototypes and interfaces for key operations and refined solutions with product and engineering teams.
- Developed the design system and guidelines to maintain consistency as new features were introduced.

Additional experience

Zolmi

Product Designer · Part-time | Feb 2020 – Apr 2025

- Designed a service-business management platform covering scheduling, customer records, operational workflows, and user portals.
- Refreshed existing interfaces and created data-management tools based on user feedback.
- Created a configurable widget system. Worked on infographics, branding, and marketing materials.

Intelliants LLC

UX/UI Designer · Part-time | Dec 2019 – Mar 2025

- Designed web and mobile products for international clients, from requirements and UX exploration to final UI.
- Created prototypes, design systems, and specifications. Presented design solutions to clients and supported implementation.
- Conducted UX audits and refined interfaces using data, feedback, and test results.

Sibers

UX/UI Designer | Nov 2016 – Apr 2025

- Designed web and mobile applications for international clients, including complex B2B systems.
- Created user flows, interactive prototypes, interfaces, and design systems. Reviewed implementation quality.
- Collaborated with product owners, analysts, developers, and marketers on research and validation.

100Watts Games

Designer & Illustrator | Nov 2013 – Sep 2016

- Created game interfaces, icons, concept art, characters, environments, and promotional materials.
- Prepared graphics for integration and collaborated with developers on game interfaces.
